SECTION

Getting started

Todaytec CRM is where you keep your customers, projects, quotations and POs in one place.

Sign in

1. Open the CRM link in your browser.
2. Type your work **Email** and **Password**.
3. Leave **Remember me** ticked on your own computer.
4. Click **Sign in**.

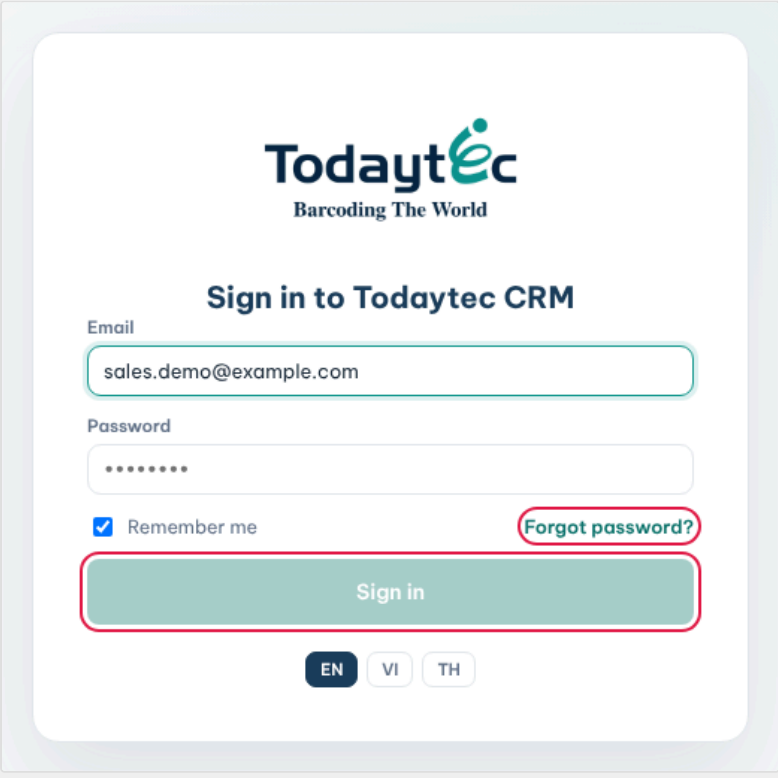

Figure 1 — Sign-in screen with the Sign in button and Forgot password link

After 10 wrong passwords, the CRM locks sign-in for 15 minutes.

Forgot your password

1. On the sign-in screen, click **Forgot password?**.
2. Type your email and click **Send reset link**.
3. Open the email and click the link. It works for 30 minutes.
4. Type it in **New password** and **Confirm password**, then click **Update password**.
5. Click **Go to sign in** and sign in with the new password.

The top bar

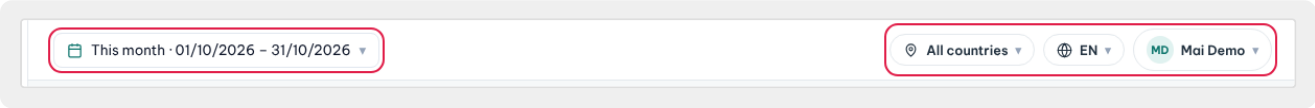

Figure 2 — Top bar: date range on the left, country, language and profile on the right

- **Date range** (left): every page opens on **This month**. Click it to pick another period.
- **Country**: shows **All countries** when you cover more than one market. Pick one market to narrow every page.
- **Language**: switch between **EN**, **VI** and **TH**.
- **Your name**: click it for **View profile** and **Sign out**.

Change the date range

1. Click the date button on the left of the top bar.
2. Pick a preset, such as **Last month** or **Year to date**.
3. Or click a start day and an end day on the calendar.
4. Optional: choose a period in **Compare to**.
5. Click **Apply**.

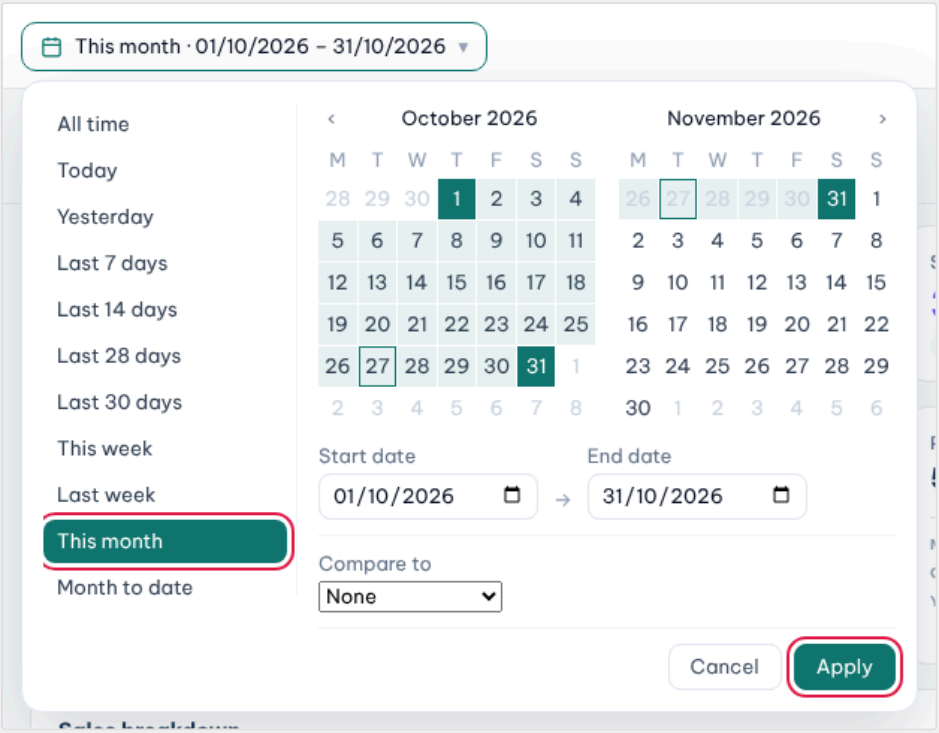

Figure 3 — Date range picker with This month selected and the Apply button

Update your profile

1. Click your name, then **View profile**.
2. In **My profile**, change your name, phone or photo (**Upload photo**).
3. Click **Save**.

The sidebar

- The sidebar lists only the modules you have access to.
- Indented items belong to the item above them. For example, **Pipelines**, **Samples** and **Quotations** sit under **Projects**.
- Clicking a module in the sidebar always brings you back to its list.
- Click **‹** at the top to hide the sidebar. Click **›** to show it again.

> **TIPS**
>
> - The date range and country apply to every page at once.
> - Your language choice stays on this browser.

02
SECTION

Overview

Overview is your dashboard: it shows how your customers, projects and sales are doing for the chosen period.

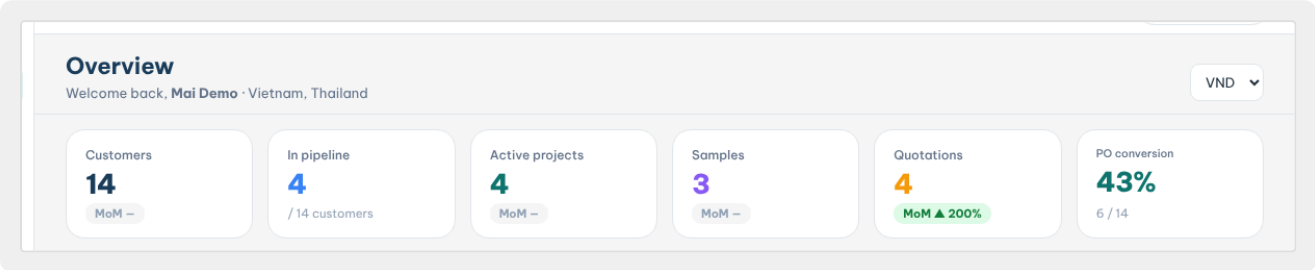

Figure 4 — Overview page: counters for customers, pipeline, projects, samples, quotations and PO conversion

Read your numbers

1. Set the period with the date range in the top bar.
2. Read the top counters: **Customers**, **In pipeline**, **Active projects**, **Samples**, **Quotations** and **PO conversion**.
3. Check the value cards: **Total value**, **PO value**, **Project value** and **Submitted forecast**.
4. Each value card shows **MTD**, **QTD** and **YTD**, with the change against the last period.

Drill into the details

1. Click an **MTD**, **QTD** or **YTD** figure on **PO value** to open those POs in **PO List**.
2. Scroll to **Sales breakdown** to see your sales by company, sales rep, product and customer type.
3. Type in a table's search box to find one company or product.
4. In **Re-order radar**, click **View all →** to open **Retention**.
5. In **Running projects**, click a project to open it.

TIPS

- **Upcoming meetings** lists the meetings you logged on customer profiles.
- **Submitted forecast** counts only forecast rows set to **Submitted** or **Locked** in **Sales Forecast**.
- Numbers only include the customers you are allowed to see.

03
SECTION

Customers

Customers holds every company you sell to, with its contacts, status and history.

Find a customer

1. Click Customers in the sidebar.
2. Type a company name, phone, email, Business ID or PO number in the search box.
3. Narrow the list with Type, Lead source, Pipeline or Has (Has projects / Has PO).
4. Use Sort by to order the list.

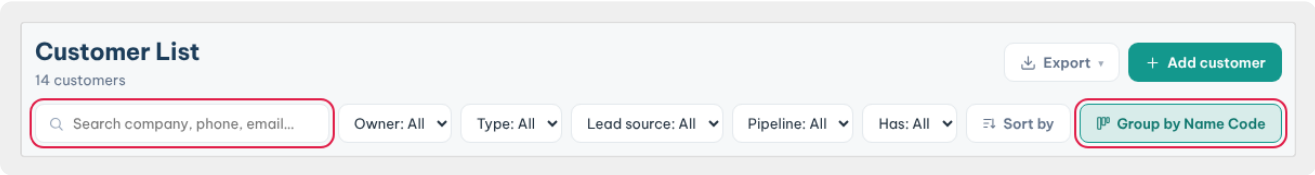

Figure 5 — Customer list toolbar: search box and Group by Name Code button

Group by Name Code is on by default. Companies with the same Name Code show as one row.

- Click the row or its arrow to see the companies under it.
- Click View detail → to open the customer profile.
- Click Group by Name Code again to see one row per company.

Add a customer

1. Click Add customer.
2. Type the Company name. The CRM suggests a code in Name Code.
3. Keep the suggestion, pick an existing code to join that group, or type a new one.
4. Fill Country, Type and Phone. They are required.
5. Add the Business ID if you have it. The hint shows the right length per country.

6 Click **Create customer**.

The CRM checks for duplicates while you type.

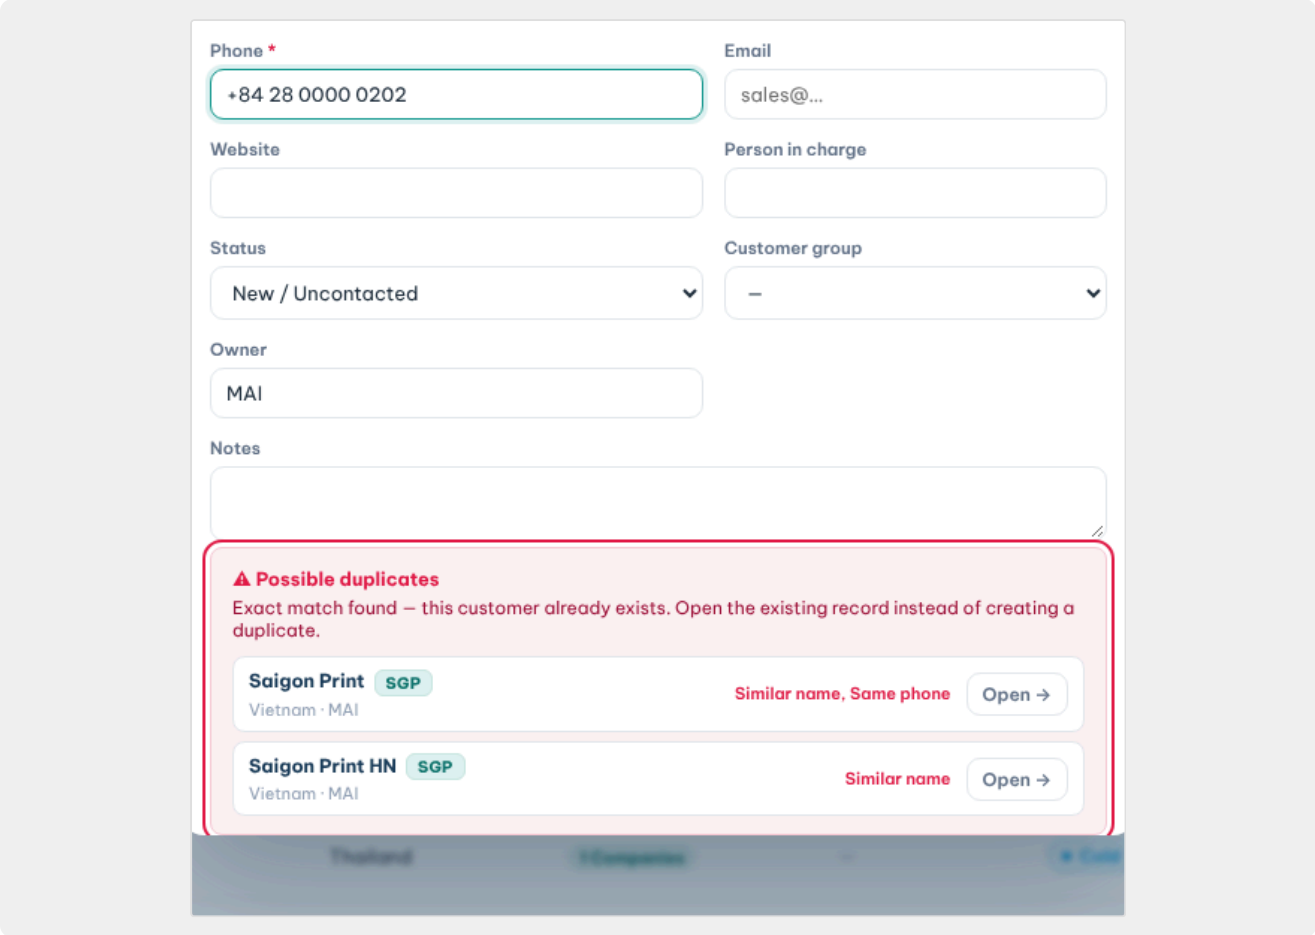

Figure 6 — Possible duplicates warning in the Add customer form

- **Similar records found**: check the list, then create the customer if it is really new.
- **Exact match found** (same name, Business ID, phone or email): you cannot create it. Click **Open →** to use the existing record.

Work on a customer profile

1. Open the customer from the list.
2. Pick a new status in **Update status**.
3. The customer moves to the matching pipeline stage. For example, **Quotation / Quote** moves it to **Warm Lead**.

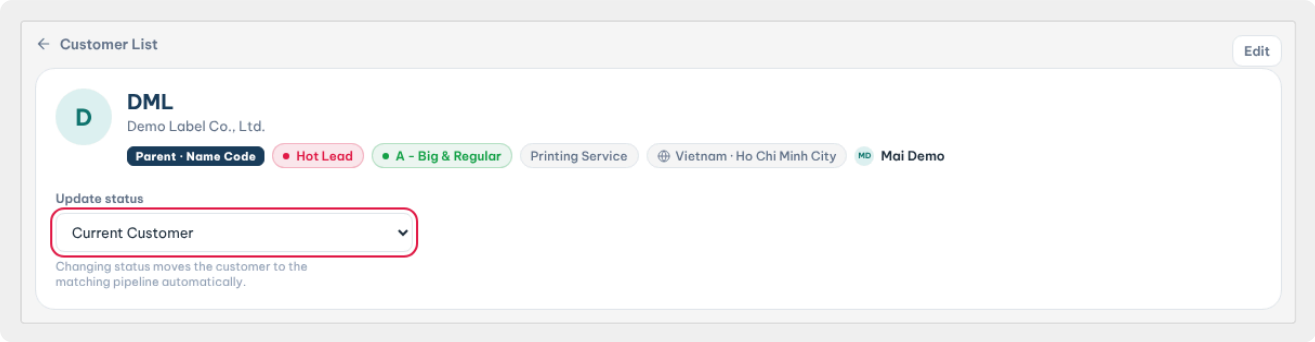

Figure 7 — Customer profile with the Update status dropdown

The profile also shows the customer's companies, contacts, projects, POs, samples, quotations and retention.

- Click **New project** or **New PO** on the profile to start one for this customer.
- Click **Edit** at the top right to change the customer details.

Log contacts and set the next action

1. Scroll down to **Interaction timeline**.
2. Pick **Note**, **Call**, **Meeting** or **File**.
3. For a call, choose the outcome, such as **Connected** or **No answer**.
4. For a meeting, choose the date and time.
5. Type what happened and click **Log it**.
6. Fill **Next action date** and **Next action note**. They save when you click outside the box.

TIPS

- Meetings you log appear in **Upcoming meetings** on **Overview**.
- A **No contact in 14+ days** flag means it is time to call this lead.
- Status changes are logged in the timeline automatically.

04
SECTION

Pipelines

Pipelines shows your projects as cards on a board, one column per stage.

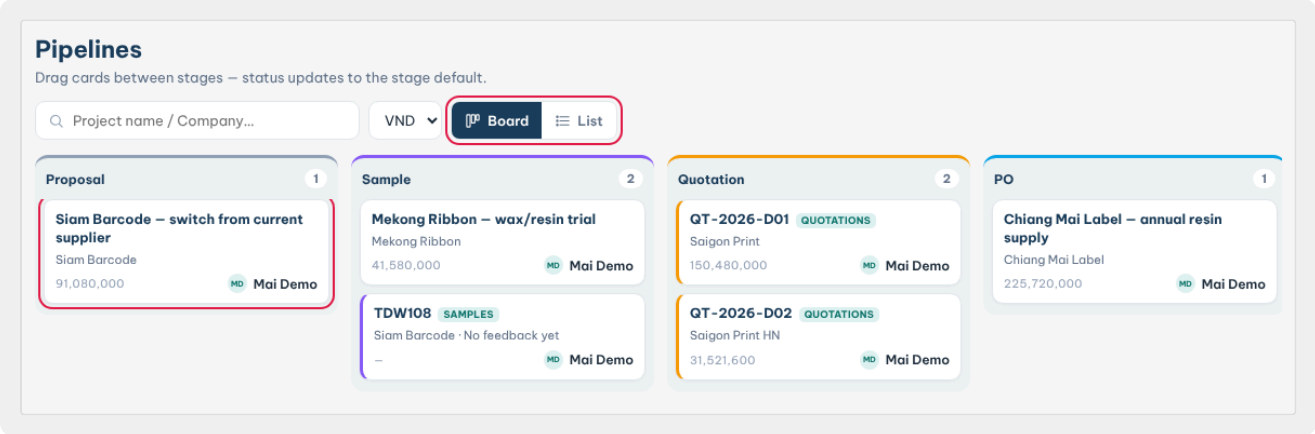

Figure 8 — Pipelines board with the Board / List switch and a project card

See where your deals are

1. Click **Pipelines** in the sidebar.
2. Read the columns from left to right: **Proposal**, **Sample**, **Quotation**, **PO**, **Won** and **Lost**.
3. The number on each column is how many cards it holds.
4. Type a project or company name in the search box to find one card.
5. Click **List** to see the same projects as tables. Click **Board** to go back.

Move a project to the next stage

1. Drag the project card to its new column.
2. Drop it. The project's stage changes at once.
3. Click a project card to open the project.

TIPS

- Cards tagged `SAMPLES` and `QUOTATIONS` come from the Samples and Quotations modules. You cannot drag them. Click one to open that sample or quotation.
- Moving a card needs `Edit` access on Pipelines.
- The board follows the date range in the top bar. Widen it if a project is missing.

05
SECTION

Projects

Projects tracks each sales opportunity with a customer, from the first proposal to the PO.

Create a project

1. Click **Projects** in the sidebar, then **New Project**.
2. Pick the **Customer**, or choose **➕ New customer** and type its name.
3. Type the **Project name**.
4. Pick the **Project type**: **New project**, **Resupply** or **Conversion**.
5. Under **Proposed product · SKU**, type a product code and pick it from the list. Add the quantity.
6. Fill what you know: **Expected close**, **Potential**, **Current supplier**, **Win probability (%)**.
7. Click **Create project**.

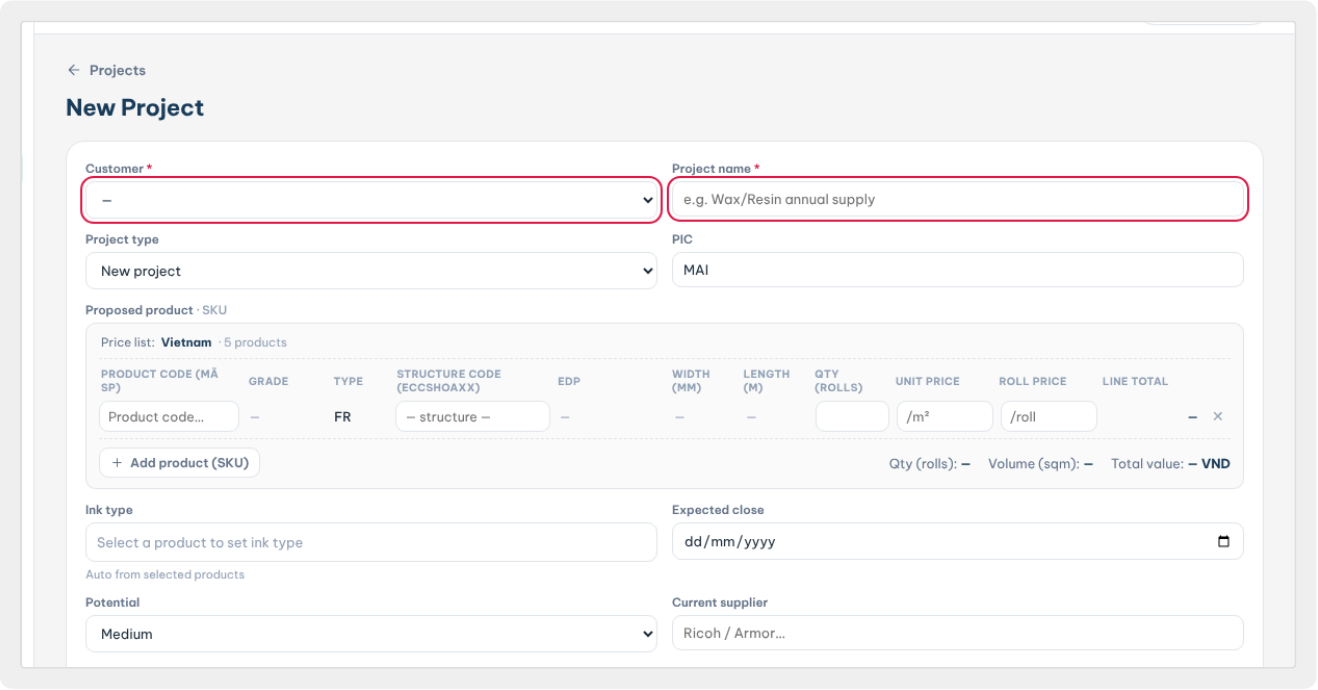

Figure 9 — New Project form with the Customer and Project name fields

Ink type fills itself in from the products you pick.

Each new project gets a code: country, date and number, such as VN261027-01 or TL261027-02.

Move a project forward

1. Open the project from the list.
2. Pick the new Stage: Proposal, Sample, Quotation, PO, Won or Lost.
3. The change is saved and logged on the customer's timeline.
4. Click Edit to change other details.

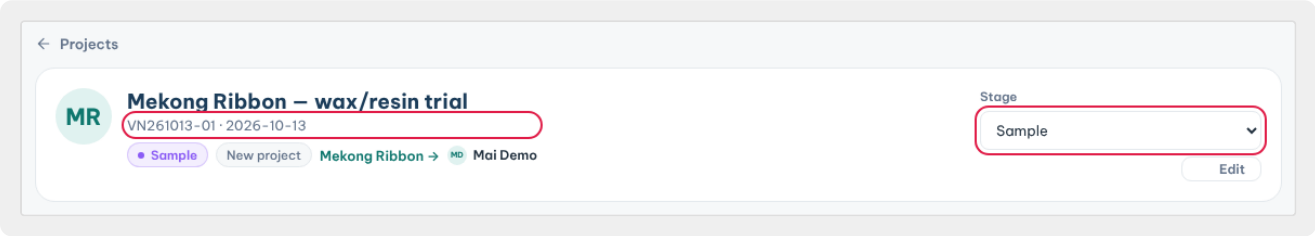

Figure 10 — Project detail with the project code and the Stage dropdown

Find a project

1. Type a company name or Business ID in the search box.
2. Filter by Stage.
3. Click the customer name to open the customer instead of the project.

TIPS

- When a project closes, fill Project result in the project form.
- Projects also show on the customer profile. You can start one there with New project.

06
SECTION

Samples

Samples tracks the test rolls you send to customers and what they thought of them.

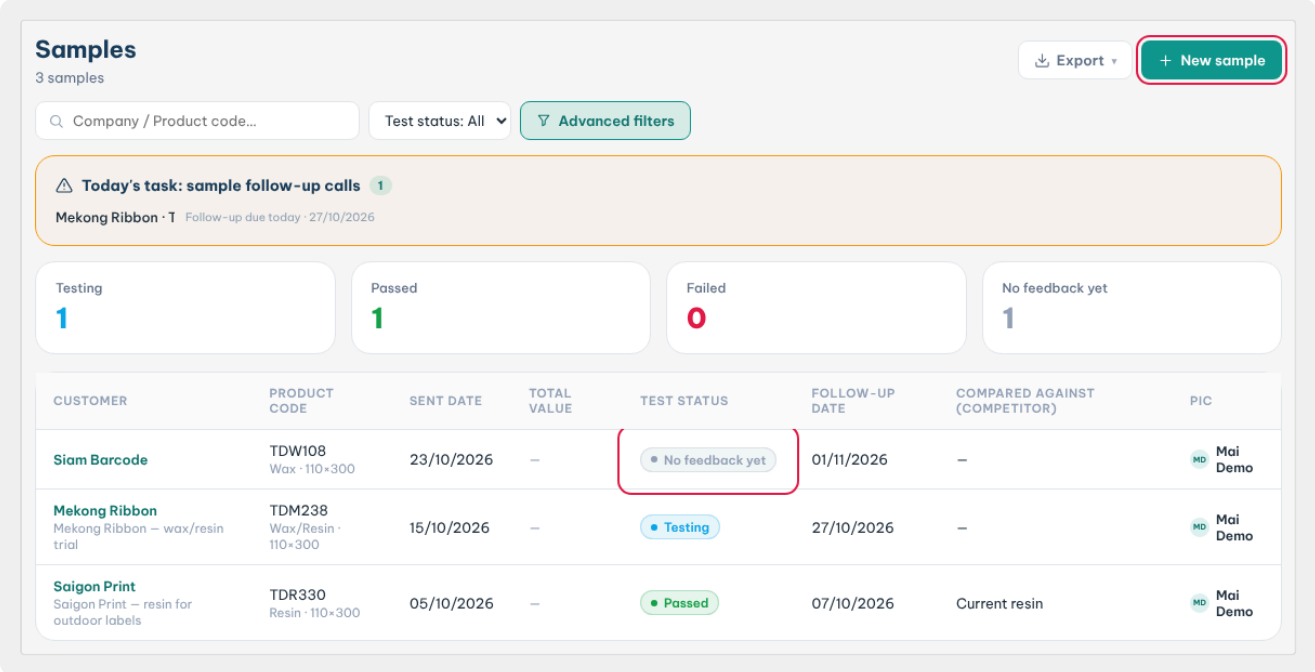

Figure 11 — Samples list with the New sample button and a test status

Log a sample you sent

1. Click **Samples** in the sidebar, then **New sample**.
2. Pick the customer and, if there is one, the linked project.
3. Add the product code and quantity.
4. Fill **Sent date**, **Courier** and **Tracking no.**.
5. Check the **Follow-up date**. It is set to 14 days after the sent date.
6. Click **New sample**.

Record the customer's feedback

1. Open the sample from the list.
2. In **Test status**, pick **Passed**, **Failed**, **Testing** or **No feedback yet**.
3. Fill **Feedback date** and **Feedback note**.
4. Pick the project in **Link to project** if it is not linked yet.
5. Click **Save & link project**.

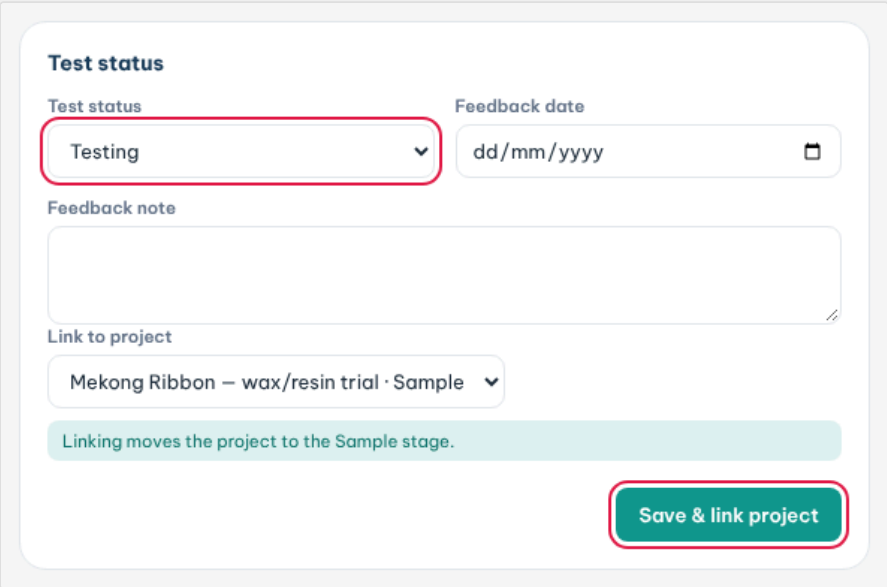

Figure 12 — Test status card with the Save & link project button

Follow up on time

1. Check the card **Today's task: sample follow-up calls** at the top of the page.
2. **Follow-up due today** means call today. **Follow-up overdue** means the date has passed.
3. Call each customer on the list and record the feedback.
4. Use **Test status** or **Advanced filters** to see only the samples you need.

TIPS

- Linking a sample moves the project to the **Sample** stage.
- The counters at the top show how many samples are testing, passed, failed or without feedback.

07
SECTION

Quotations

Quotations is where you price a deal, track its status and send the quote to your customer.

Create a quotation

1. Click **Quotations** in the sidebar, then **New quotation**.
2. Pick the **Customer**, or choose **➕ New customer**.
3. Optional: pick the project in **Link to project**.
4. Check **Quote date**, **Valid until** and **Payment terms**.
5. Under **Line items**, type a product code and pick it from the list.
6. Pick the **Structure code**, then type the **Qty (rolls)** and the **Unit price** per m².
7. Click **+ Add product (SKU)** for more lines.
8. Click **New quotation** to save.

The **Roll price** and **Line total** are worked out for you. You can type a roll price instead.

Open and update a quotation

1. In the list, click the quotation row or the customer name. Both open the quotation detail.
2. Change the **Status**: **Draft**, **Sent**, **Negotiating**, **Won** or **Lost**.
3. Click **Edit** on **Line items** to change products or prices.
4. Pick a project under **Link to project** and click **Save & link project**.

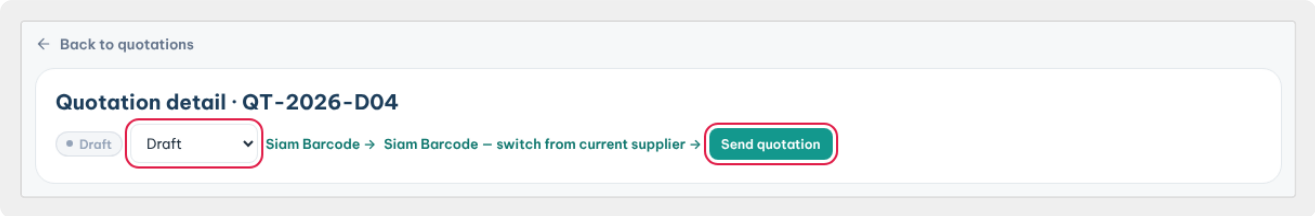

Figure 13 — Quotation detail with the Status dropdown and the Send quotation button

A customer with several quotations shows as one row. Click it to see them all.

Send the quotation

1. On the quotation detail, click **Send quotation**.
2. Under **Seller (company)**, check the **Country**.
3. If you see **Company info: first-time setup**, fill in your company details once.
4. Click **Save company info**. From then on they are fixed for that country.
5. Check **Customer & terms**, such as **Attend** and **Term of payment**.
6. Under **Currency**, pick the **Quote currency** and check the USD rate.
7. Untick **Show USD column** if the customer should not see USD prices.
8. Under **Products**, adjust the **MOQ**, the unit price or the product note if needed.
9. Check the **Preview** on the right.

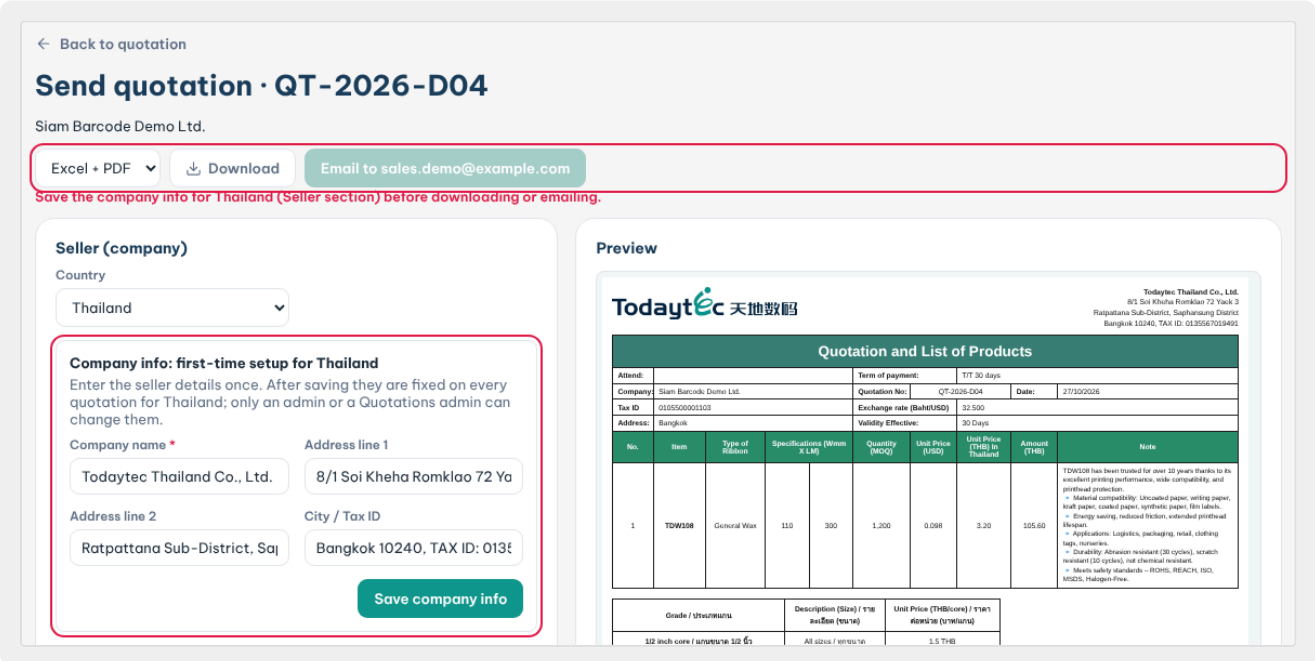

Figure 14 — Send quotation: file format, Download and Email buttons, and the seller company block

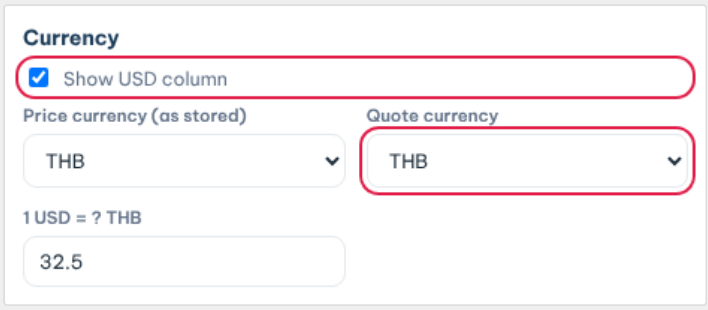

Figure 15 — Currency section with the Show USD column checkbox and the Quote currency

Download or email it

1. Pick the file type at the top: `Excel + PDF`, `Excel` or `PDF`.
2. Click `Download`. One file saves at once.
3. With `Excel + PDF`, the two files appear as links under the buttons. Click each link to save it.
4. Or click `Email to` your address. The files come to your own inbox.
5. Forward that email to the customer.

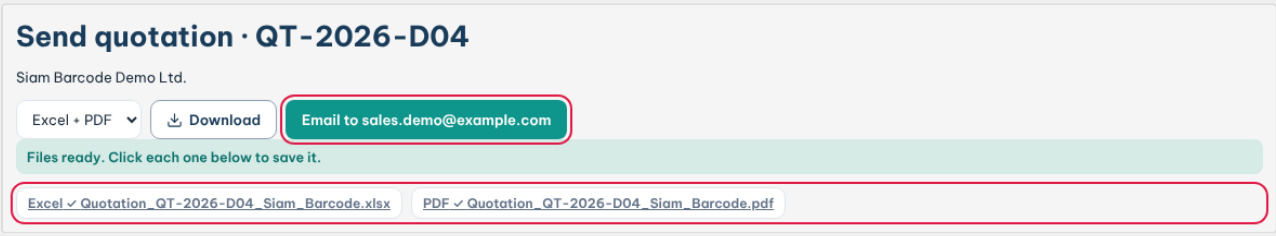

Figure 16 — Download links for the Excel and PDF files, next to the Email button

TIPS

- Download and email stay disabled until the seller company is saved for that country.
- Once saved, only an admin or someone with `Admin` level on Quotations can change the seller company. Ask them if it is wrong.
- Your changes on `Send quotation` are kept for the next time you send this quote.
- When a quote is `Won`, create the PO from it. See `PO List`.

08
SECTION

PO List

PO List records every purchase order your customers place, so sales and targets stay up to date.

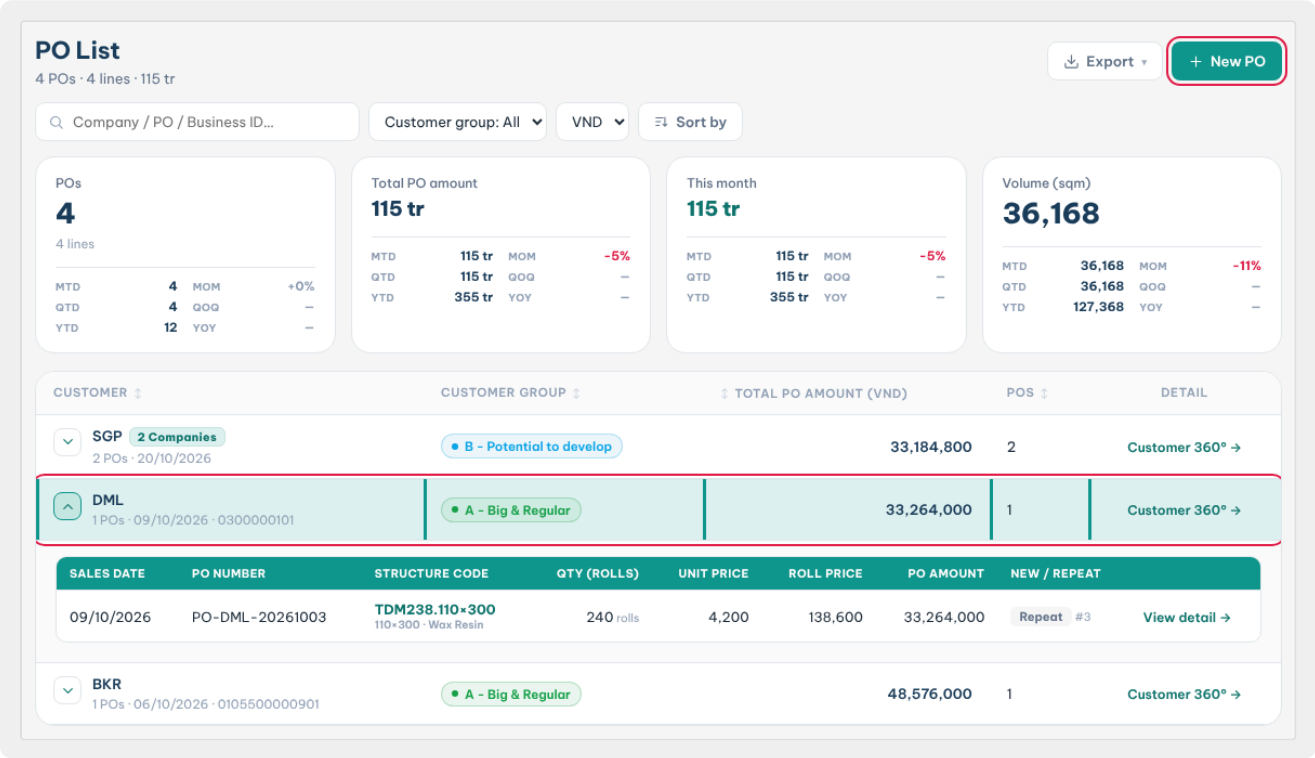

Figure 17 — PO List with the New PO button and one customer row opened

Find a PO

1. Click **PO List** in the sidebar.
2. Set the period with the date range in the top bar.
3. Type a company name, PO number or Business ID in the search box. Search covers all dates.
4. Click the arrow on a customer row to see its POs.
5. Click **View detail →** to open one PO. Click **Customer 360° →** to open the customer.

Create a PO from a won quotation

1. Open the quotation and set its **Status** to **Won**.
2. In the green box **Create PO from this quote**, click **New PO**.
3. The New PO form opens with the customer, currency, every product line and **Quotation reference** filled in.
4. Check the quantities and prices against the customer's PO. Fix any line that differs.
5. If a line's **Structure code** is empty, pick it from the list.
6. Type the **PO number** and check the **Sales date**.
7. Click **New PO** to save.

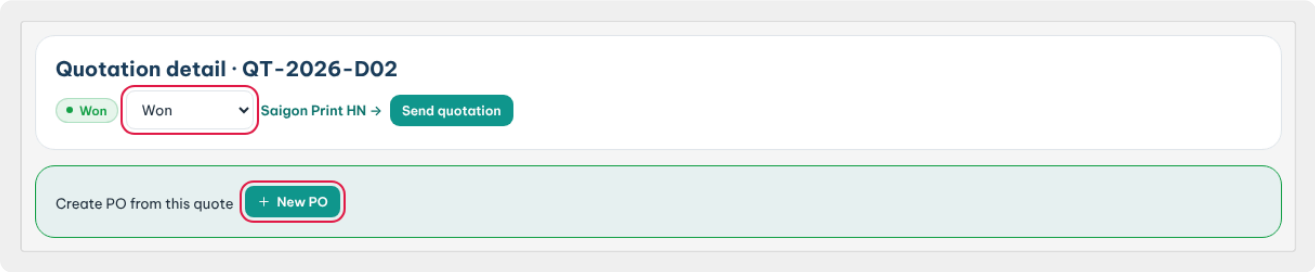

Figure 18 — Won quotation with the New PO button

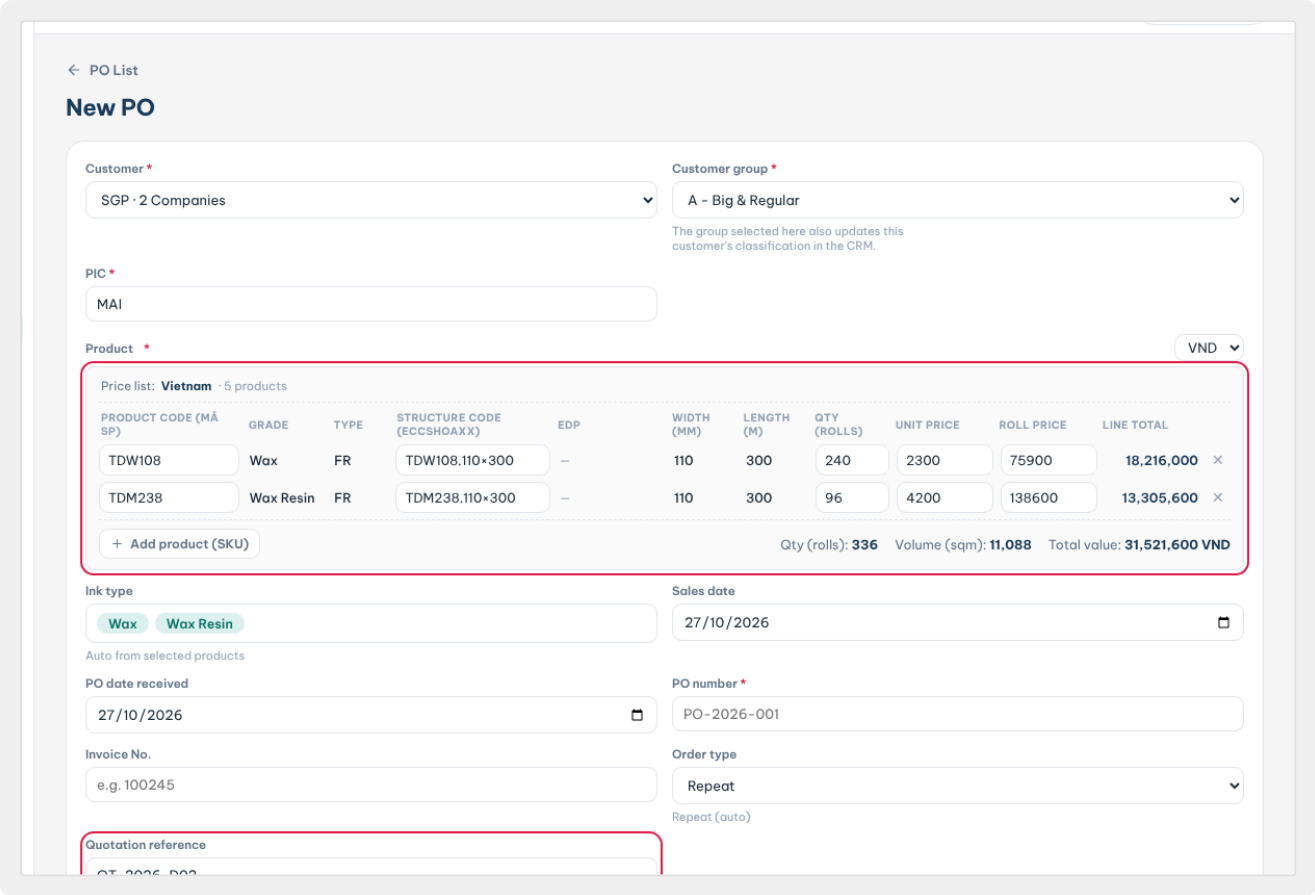

Figure 19 — New PO form opened from a quote, with both quote lines and the Quotation reference filled in

Create a PO without a quotation

1. Click **New PO**.
2. Pick the **Customer**, **Customer group** and **PIC**.
3. Add the products, quantities and prices.
4. Type the **PO number**. Add the **Invoice No.** if you have it.
5. Under **Attachments (PO proof)**, upload the customer's PO file or photo.
6. Click **New PO**.

TIPS

- Click the customer row anywhere, or its arrow, to open or close it.
- The **Customer group** you pick also changes the customer's group in the CRM.
- **Order type** (**New** or **Repeat**) is set for you from the customer's PO history.
- Deleting a PO needs **Admin** level. It removes every line of that PO number.

09
SECTION

Retention

Retention warns you which customers are late with their next order, so you can call them before they leave.

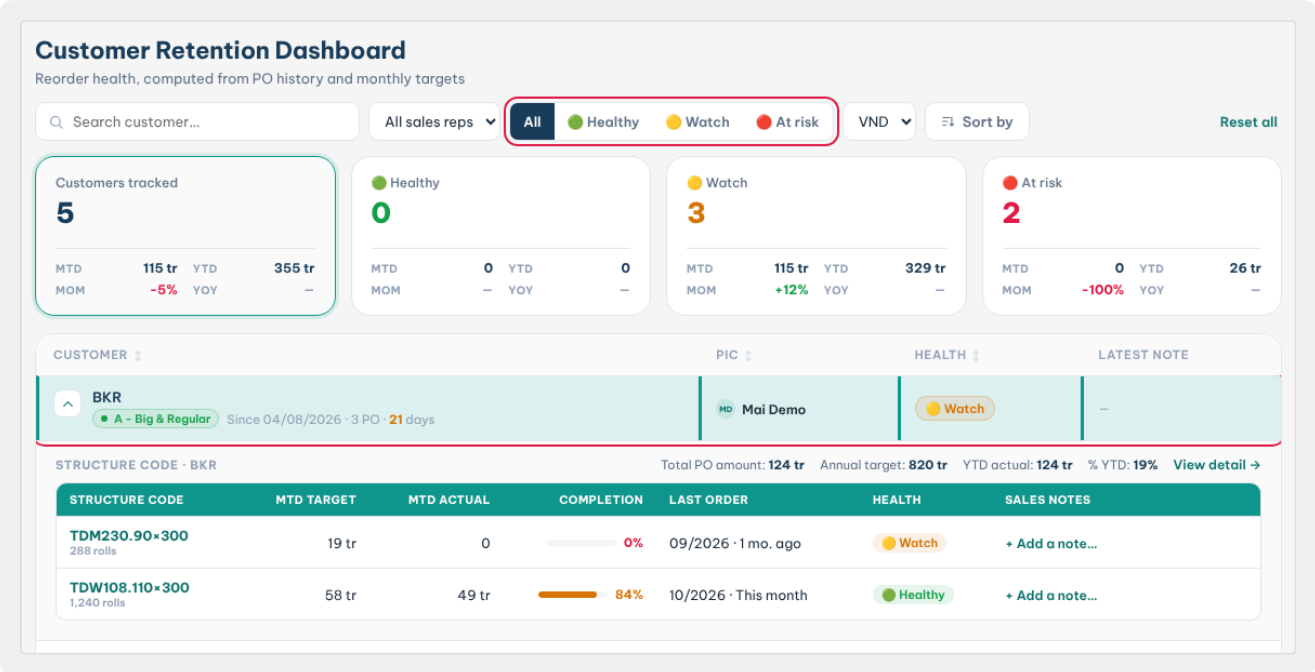

Figure 20 — Retention dashboard with the health filter and one customer opened

Find customers who need a call

1. Click **Retention** in the sidebar.
2. Click **🔴 At risk** or **🟡 Watch** to see only those customers.
3. Or click a counter card, such as **At risk**, to filter the list. Click it again to clear.
4. Use **Search customer...** to find one company.

The health colours mean:

- **🟢 Healthy**: ordering on schedule and near or above target.
- **🟡 Watch**: the order is overdue or below target.
- **🔴 At risk**: well overdue and well below target.

See what a customer buys

1. Click the customer row.
2. Read `Total PO amount`, `Annual target`, `YTD actual` and `% YTD`.
3. Check each `Structure code`: its `Last order`, `Completion` and `Health`.
4. Click `View detail →` to open the customer profile.

Leave a note

1. In the opened customer row, click `+ Add a note…` next to a product.
2. Type what you agreed with the customer.
3. Press `Enter` or click `Save`.

TIPS

- Health is worked out from the customer's PO history and monthly targets.
- Your colleagues see your notes too. Each note is also copied to the customer's activity log.
- Click `Reset all` to clear every filter.

10
SECTION

Targets & Forecast

Targets holds your sales targets (KPI). **Sales Forecast** predicts next months' orders per customer and product.

Check your targets

1. Click **Targets** in the sidebar.
2. Pick the **Year** and the currency.
3. **Input by PIC** shows your monthly targets per customer type group.
4. **By customer** shows the plan per customer and product. Click the arrow on a customer to see its items.
5. **Tracking** compares target and actual: **MTD Tracking**, **Previous month (Act)** and **YTD Tracking**.

Figure 21 — Sales Targets page with the Input by PIC, By customer and Tracking tabs

Enter a target

1. Open **Input by PIC** or **By customer**.
2. Click a month cell.

3. Type the amount in the currency shown on the page, then press **Enter**.

You need **Edit** access on Targets to type in the cells. Actuals come from **PO List**.

Fill in your forecast

1. Click **Sales Forecast** in the sidebar.
2. Each customer shows the products it bought, with **FC** (forecast) and **ACTUAL** rows per month.
3. Type the forecast quantity in the **FC** cell for the current or a future month. The value fills in from the list price.
4. Add a note in **Notes** if needed.
5. Set **Status** to **Submitted** when the numbers are final.

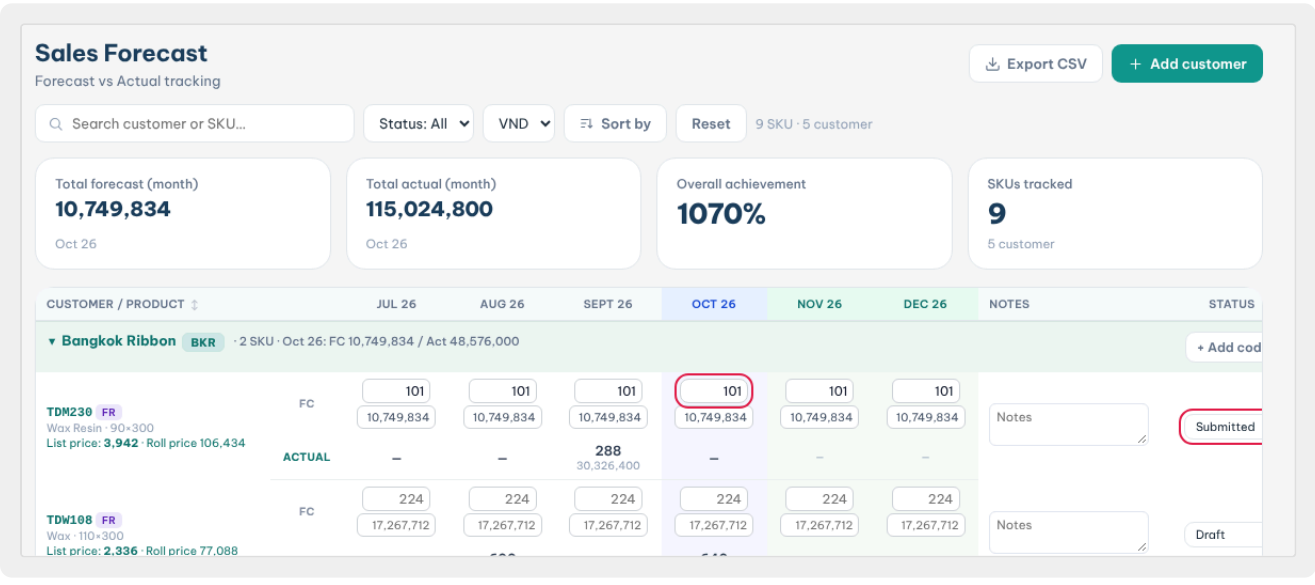

Figure 22 — Sales Forecast with a forecast cell and the Status dropdown

Add a customer or a product to the forecast

1. Click **Add customer** to forecast a customer that has no PO yet.
2. Click **+ Add code** on a customer row to add another product.
3. Pick from **Codes already bought** or **Never bought**.

TIPS

- Greyed numbers in the **FC** cells are only suggestions: the latest actual × 35%.
- **Total forecast (month)** counts only rows set to **Submitted** or **Locked**.
- Submitted and Locked rows also show on **Overview** as **Submitted forecast**.
- A **Locked** forecast can no longer be edited.

11
SECTION

Products

Products is the price list: every ribbon code with its grade, size and price for each country.

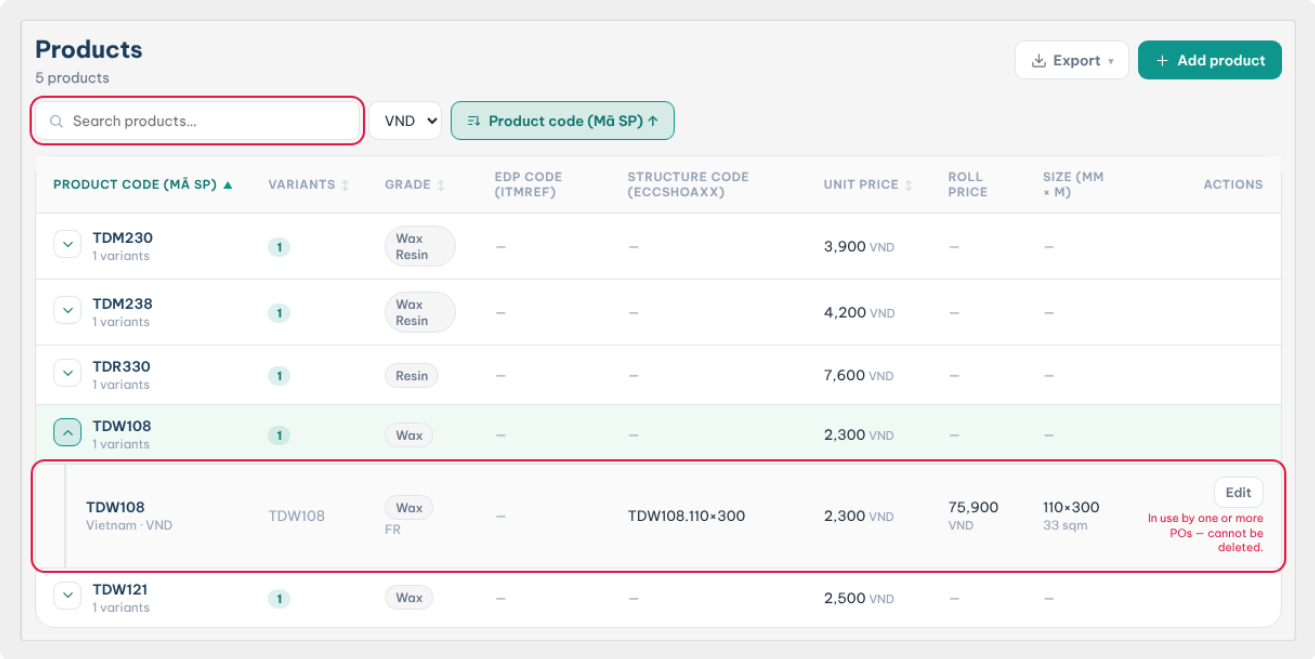

Figure 23 — Products list with the search box and one product opened to show its variant

Look up a product or price

1. Click **Products** in the sidebar.
2. Pick the market in the top bar. The list and currency follow it.
3. Type a code, name or structure code in **Search products...**.
4. Click the arrow on a product code to see its variants.
5. Read the **Unit price** (per m²), **Roll price** and **Size (mm × m)**.

Add or change a product

1. Click **Add product**, or **Edit** on a variant row.
2. Fill **Commercial name**, **Product code**, **Grade** and **Country**.
3. Fill the **Structure code**, **Width (mm)** and **Length (m)**. The m² per roll fills in.
4. Type the **Unit price** and pick the **Currency**. The roll price is worked out.
5. Click **Save**.

TIPS

- Quotations, projects and POs take their product list and prices from here.
- Pick another currency in the toolbar to see prices converted.
- A product used by a PO cannot be deleted.

12
SECTION

Access & FAQ

Your access level decides what you can see and do in each module of the CRM.

What the access levels allow

Your admin sets one level per module for your role.

Level	What you can do
—	The module is hidden from your sidebar.
View	Open and read the module, and use Export.
Edit	Everything in View, plus create and edit records.
Admin	Everything in Edit, plus delete, Import Excel and maintenance actions.

The same legend shows above the matrix on the Permissions page.

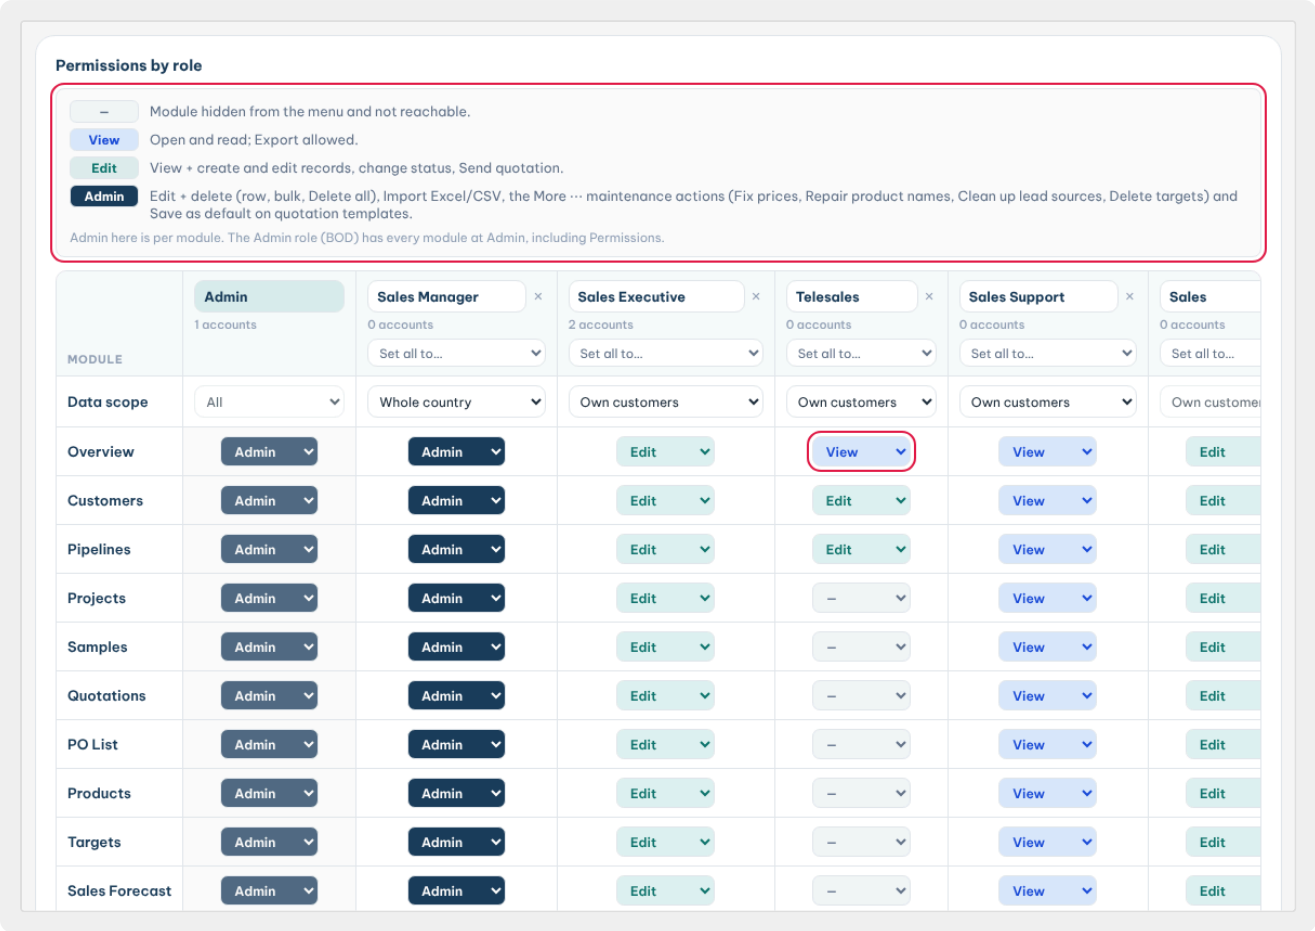

Figure 24 — Permissions page: the legend of access levels above the matrix of View / Edit / Admin dropdowns

Your **Data scope** decides whose records you see:

- **Own customers**: only your own customers and their records.
- **Whole country**: every customer in your country.
- **All**: every record, in every country.

FAQ

Q Why can't I see a button?

Buttons you are not allowed to use are hidden. For example, **Import Excel** and **Delete** need **Admin**. **New …** buttons need **Edit**. Some fields show but are greyed out, like a status you can only read.

Q Why is a customer or PO missing?

1. Check the date range in the top bar. Try **All time**.
2. Check the country in the top bar. Try **All countries**.
3. Clear the search box and filters.

4. If it is still missing, it may belong to another sales rep. Ask your manager.

Q What is the More (···) button?

It holds admin actions, such as deleting many records at once. It only shows if your level allows them.

Q How do I reset my password?

1. On the sign-in screen, click **Forgot password?**.
2. Type your email and click **Send reset link**.
3. Open the link in the email within 30 minutes and set a new password.

Q I forgot my password and the email does not arrive.

Check your spam folder. Then ask your admin to set a new password for you.

Q Who do I ask?

- Access, roles and passwords: your CRM admin.
- Which customers are yours: your sales manager.
- Wrong seller company details on a quotation: your CRM admin.
